

CorProfit[®] SERVICE OFFERINGS TO DELIVER EFFECTIVE ENTERPRISE RISK MANAGEMENT

Aligning risk management to the strategic planning process is an essential element in ensuring business resilience and market competitiveness. At CorProfit, we recognise that a one-size-fits-all philosophy is not enough to embed the risk process. We offer an integrated approach that harnesses a range of risk types to produce a consolidated analysis, quickly highlighting the 'hot spots' to focus on. We work with private and public sector clients to implement effective risk management solutions across all business areas.

Our risk management solutions are based on a combination of consultancy, methodology and technology. Each implementation is different, given that every client has their own culture and unique set of requirements that need to be supported to ensure success. Our approach pulls together individual risk strategies under one common framework, enabling better management visibility, improved decision making and ultimately a 'future-proof' business.

The range of services we provide cover:

Consulting services

- Strategic consultancy and advice in developing an enterprise risk management 'roadmap' that supports the full evolution of risk management within your organisation – from initial implementation until it becomes integral to day-to-day business
- Definition of a risk policy and terms of reference, a risk framework and implementation plan for the business
- Input gathering and analysis from all business areas to create a holistic risk profile, ensuring that risks can be viewed and measured consistently at a framework level, while enabling each department to manage specific risks according to local requirements.

Mentoring and peer reviews

- Assignment of a dedicated risk mentor for each client, who works closely with the organisation to define, shape and evolve the risk management roadmap over time
- Regular peer reviews to measure progress against the roadmap, with a key commitment being to transfer knowledge and build expertise within the client organisation
- Development of an integrated approach to risk, compliance and assurance to ensure delivery of tangible business benefits.

KnowRisk® software solution

- Risk management tools based on highly sophisticated yet intuitive technology, tailored to the needs of each user
- Patented* software founded on guidelines stipulated in ISO31000, Solvency II, BASEL and other leading international risk management standards
- A tried and tested solution in use by over 100 clients across a range of private and public sector organisations
- Capable of integration with existing risk management databases and corporate technologies
- A product that is fully configurable in our clients' hands, offering high levels of flexibility
- Technology sophisticated enough to cope with future demands, as the needs of the business and compliance requirements evolve.

*U.S. Patent No. 8,010,938

Implementation services

- Tailored workshops facilitated by experienced consultants, designed to identify all significant risks within the organisation and input these directly into the KnowRisk® tool
- Enterprise-wide data capture, enabling comprehensive reports and powerful graphic representations to be produced
- Detailed analysis and interpretation of the risk register and aggregated impacts on the business, enabling robust action planning.

Training and education

- A range of targeted training programmes designed to meet the needs of different types of users
- A suite of offerings including classroom style courses, refresher sessions, webinars and e-learning to ensure that risk management expertise is transferred and embedded in your organisation.
