

CorProfit[®] TRAINING SOLUTIONS TO SUPPORT EFFECTIVE ENTERPRISE RISK MANAGEMENT

With risk management now maturing as a discipline, corporations require successful implementation of risk strategies. Risk management is a key enabler in realising tangible business opportunities, yet regulatory bodies are imposing increasingly stringent obligations. At CorProfit we recognise that those with responsibility for managing risk in an organisation have different backgrounds and specialist areas, and must evolve their strategies as compliance dictates. Add to this the varying levels of capability at operational level, and what is needed is a flexible and tailored training strategy.

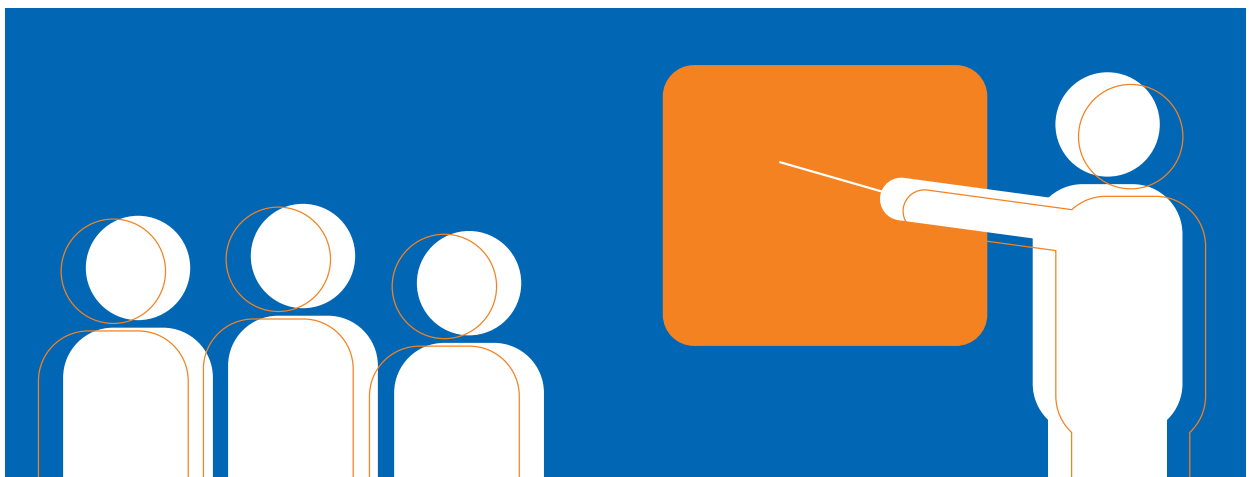

Centred around our market leading KnowRisk[®] software, we provide generic and tailored training programmes designed to equip corporations to manage risk effectively at both the enterprise and operational level. We have a strong track record in delivering training solutions that develop understanding and build capability in risk management and its applications. In short, our goal is to grow your risk management expertise.

Our training and education approach:

- We recognise that there are distinct user types for our risk management products and services, and offer tailored training to meet their needs
- We focus primarily on face-to-face classroom-style training delivered by qualified consultants, supported by ongoing involvement to ensure that knowledge is fully embedded
- Our focus is on developing the internal capabilities and expertise of the organisation to meet the diverse demands of risk management effectively, the end result being that users have control of our product
- Our tried and tested approach is formulated on the principle of starting simple and developing sophistication over time.

We can provide follow-up sessions designed to refresh users' existing knowledge of risk management concepts and introduce new features and special options. We also supplement training courses with webinars, e-learning and support documentation. All training course attendees receive a formal certificate of completion. Courses can be delivered either at client premises or at dedicated training facilities in Sydney and international offices. Training notes and full refreshments provided.

Our current schedule of training courses is shown overleaf. We see risk management as a core component of corporate governance, and also offer training courses to underpin this.

Our training offerings include:

Introduction to Operational Risk Management (1 day course)

- This course deals with the concepts and application of risk management in the business environment*
- It covers an overview of risk management, definition and rating of risks, plus application of a generic risk management process (to ISO31000)
- It includes a case study exercise to reinforce learning; all attendees receive a risk management manual and templates

Who should attend: with a comprehensive rounding-out of the process including patented CorProfit know-how, this course is of value to risk management professionals, project managers, subject matter experts and anyone requiring an understanding of risk management.

Establishing an Enterprise Risk Management Roadmap (1 day course)

- A dedicated training course designed to cover what is involved in structuring a risk management plan
- It introduces unique insights into key components that influence successful implementation of an ERM framework
- It covers risk management roadmap concepts, setting contexts of operational structures, a risk management model, gathering and evaluating risk data, implementing a risk management framework

Who should attend: chief risk officers, risk managers and heads of disciplines of risk strategies such as compliance, internal audit, safety and project management.

Fundamentals of Risk Management (2 day course)

- This course covers the fundamentals of risk management, aligned to International Risk Management Standard ISO31000
- It includes an exploration of the broad scope of managing risk and what is required to achieve ongoing proactive management – whether for IT, project, operational, business or strategic risk
- It also includes risk quantification and developing a risk-aware culture

Who should attend: risk management professionals, project managers, subject matter experts and anyone requiring an understanding of risk management.

KnowRisk® Basic User Training (1 day course)

- Our market leading product can be used at a very simple or very sophisticated level
- This course is designed to introduce risk management concepts and cover basic usage of our risk management software tool KnowRisk®

Who should attend: basic KnowRisk® users.

KnowRisk® Administrator Training (2 day course)

- The KnowRisk® database is flexible and adaptable, and straightforward to configure; most of the set-up is hidden from users
- Administrators need to know the product in more detail and assist others as 'super users'
- This training programme is structured in two stages: the first is focused on introducing risk management concepts and basic use of the KnowRisk® tool, the second phase explores more sophisticated use of the tool, such as running detailed reports
- This programme enables the administrator to support full roll-out of the ERM framework

Who should attend: advanced users, administrators (NB: Basic User Training is a pre-requisite.)

Designing Forms in KnowRisk® (2 day course)

- This course will enable advanced users to create different ways to view and input data in KnowRisk®
- Users will learn how to develop a customised user interface that reflects the organisation's own corporate style, using existing formats from other applications

Who should attend: advanced users, administrators.

Being Risk Aware (online course)

- This e-learning module is designed to help embed a broad risk awareness culture within an organisation
- It covers a basic understanding and application of risk management, whether from a strategic, planning or operational viewpoint
- It provides a first step in understanding basic concepts about being risk aware and risk management in general

Who should attend: general employees.

*Based on International Standard ISO31000 and Australian Risk Management Standard AS/NZ 4360
