

Ian Abrahams

BSc.Eng (Civil) MEngSc CPEng CPRM MIEAUST MAIRM MAIPM

Ian is the Principal Risk Management Consultant delivering CorProfit's solutions to the wider market place.

The Approach I take to Deliver your Work

The biggest challenge facing all organisations that are attempting to implement Risk Management is that it seems easy, however it is a challenge.

The fact is **you are already facing many risks**; unbeknown the approach may be fragmented or unstructured and exposes you to unwanted events.

I ensure you have value for money when providing my services, that are simple to apply; that your efforts are the minimum for the maximum level of risk mitigation.

The outcomes of a successful Risk Management implementation will be obvious; your organisation's mission, values and strategic objectives are risk managed to be successful, exposures & incidents reduce and your resilience increases.

I have also been a forerunner in aligning a range of different Risk and Governance programs including Risk Management, Audit, Project Risks, Compliance, CSA and Business Continuity Planning as well as Safety Management to work together. My approach is proven to be cost-beneficial, paying for itself over and over and enhances the value of your Risk Framework some 10-fold; this is the stage that Risk Management needs to be.

From setting an overarching, strategic Risk Management layer (ISO31000 based), other programs such as quality management, safety audits and assurance practices strengthen the effectiveness of Risk Management.

This unlocks the value of your data from having a Common Operating Picture across the Risk Management and Governance landscape, with scores and indicators that assist to show where to focus your efforts in managing risks to be as low as reasonably possible.
